# WHAT MAKES US DIFFERENT

---

Caxton Freight Brokers works with a limited number of clients to provide best-in-class freight booking and management services. By providing such exceptional service Caxton seeks to act as an outsourced shipping/logistics desk for small to medium enterprises that need greater visibility on all of their options in the global logistics and freight market.

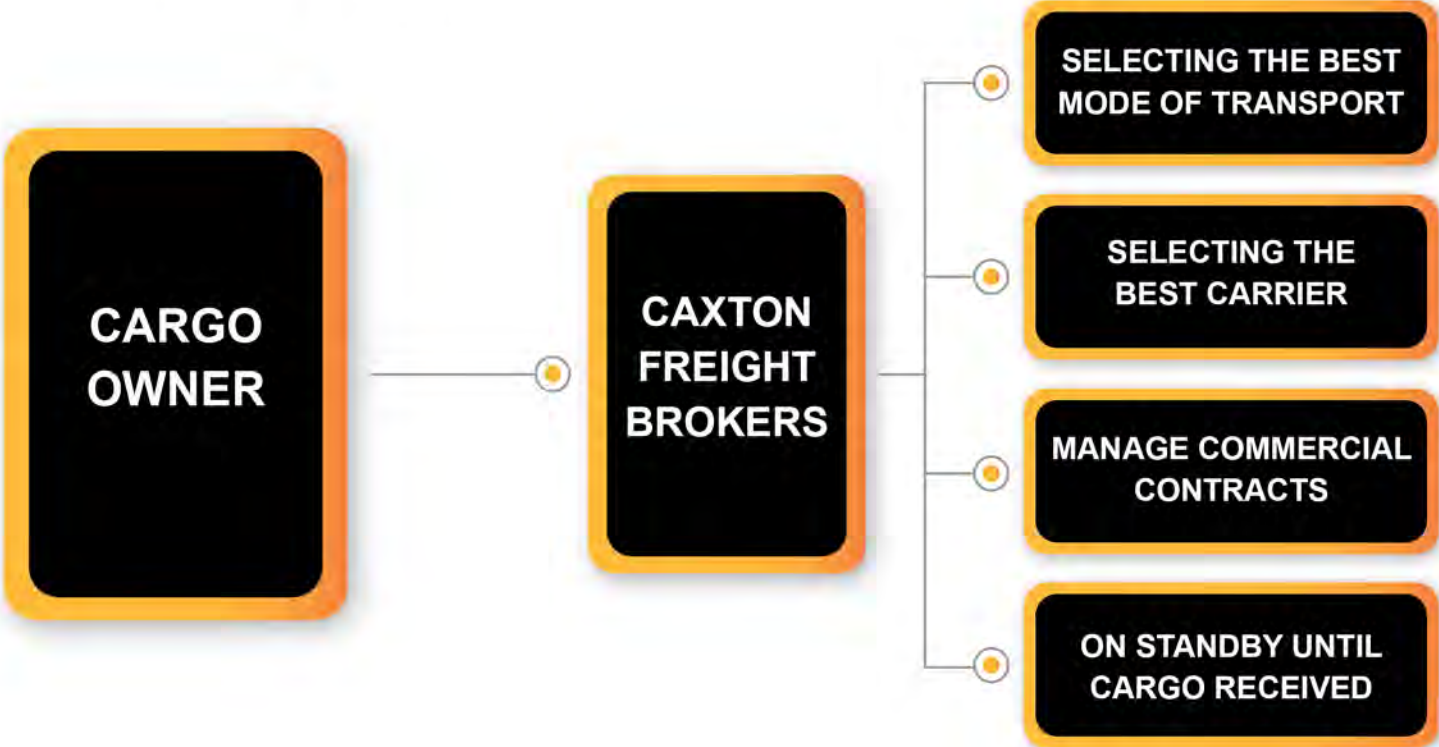

By focusing on short term solutions as well as long term partnerships with shipping lines and global third party logistics (“3PL”) companies (through minimum volume agreements) and aggregating shipments with other similar clients wherever possible, Caxton seeks to deliver outstanding shipping and logistics management for companies that do not have the resources to maintain relationships with dozens of freight forwarders, airlines, road haulage companies, sea shipping lines, ship owners as well as global 3PL companies.

# SITUATION FACING MANY SMALL BUSINESS OWNERS
